

# CHENNAI POLYPLAST

---

Your trusted source for Industrial Plastics

---

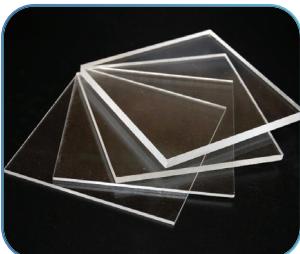

**PP - POLYPROPYLENE**  
**HDPE - POLYETHYLENE**  
**UHMW - PE**

Tough, lightweight plastics ideal for chemical and wear-resistant applications.

**POM - POLYOXYMETHYLENE / POLYACETAL**

High-strength engineering plastic with excellent machinability, low moisture absorption, and good chemical resistance.

**PMMA ACRYLIC**  
**POLYCARBONATE**  
**GPPS- POLYSTRENE**

Transparent engineering plastics offering clarity, strength, and versatility for general and industrial applications.

**PA6 -POLYAMIDE | NYLOCAST SHEETS & RODS**

Nylon PA6 sheets and rods with high mechanical strength, wear resistance, and good shock absorption for engineering applications.

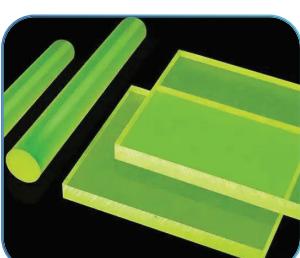

**PTFE -POLYTETRAFLUOROETHYLENE SHEETS & RODS**

PTFE sheets are chemically inert, non-stick, and high-temperature resistant materials ideal for sealing, insulation, and corrosion-resistant industrial applications.

**PEEK - POLYETHERETHERKETONE**

High-performance semi-crystalline thermoplastic with exceptional mechanical strength, heat resistance, and chemical stability.

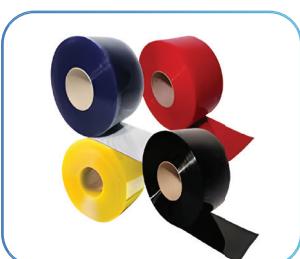

**PU - POLYURETHANE**

Cast polyurethane material offering excellent abrasion resistance, impact strength, elasticity, and oil resistance for heavy-duty industrial applications.

**EPOXY / FR4 SHEETS**

High-strength epoxy glass sheets offering excellent electrical insulation, thermal stability, and chemical resistance for industrial applications.

**PVC FLEXIBLE ROLL | PVC CURTAIN ROLL**

Flexible PVC curtain sheets designed for dust control, temperature separation, and hygiene management in industrial and commercial spaces.

### PHENOLIC PAPER | PHENOLIC FABRIC

High-strength, heat-resistant laminates with excellent electrical insulation and mechanical stability.

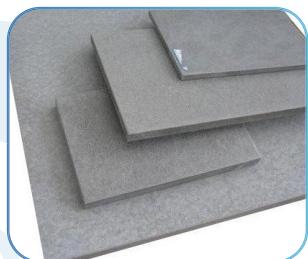

### PEI - POLYETHERIMIDE

High-temperature amorphous thermoplastic with outstanding flame resistance, dimensional stability, and electrical insulating properties.

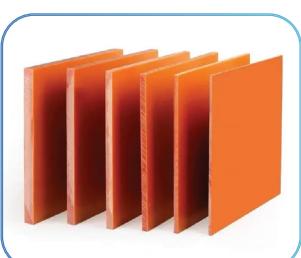

### SILICON RUBBER

Silicone Rubber is a synthetic elastomer made from a combination of silicon, oxygen, carbon, and hydrogen. Unlike conventional organic rubbers, silicone rubber has a siloxane backbone (Si-O-Si), which gives it exceptional thermal stability, flexibility, and resistance to aging.

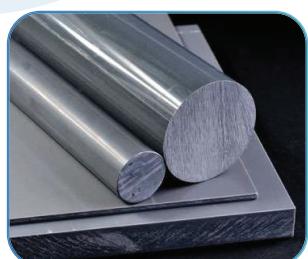

### SYNDANIO SHEET

Cement-fiber composite insulation sheets with high mechanical strength and low thermal conductivity for high-temperature applications.

### BAKELITE SHEETS

Strong, heat-resistant insulating sheets with excellent electrical, mechanical, and dimensional stability.

### PVC RIGID SHEETS & RODS

Durable, chemical-resistant plastic ideal for corrosion-proof and industrial applications.

### ABS - ACRYLONITRILE BUTADIENE STYRENE

Tough, impact-resistant plastic with good strength and surface finish for industrial use.

### ESD PRODUCTS

ESD ACRYLIC, ESD POLYCARBONATE, ESD FR4, ESD DUROSTONE, ESD BAKELITE, ESD PEEK SHEETS & RODS, AND ESD PP CORRUGATED SHEETS are electrostatic dissipative materials designed to safely control static charge while providing mechanical strength, electrical insulation, and durability for electronics and industrial applications.

### CNC ROUTER JOB

CNC machine parts are precision-engineered components manufactured with high accuracy and consistency to ensure reliable performance in industrial machining and automation systems.

## About us

Chennai Polyplast is a Chennai-based premium stockist of industrial and engineering plastics with over 25 years of experience, ensuring a ready inventory and fast, reliable supply. Our support helps customers with material expertise, just-in-time delivery, and value-added services to reduce downtime and improve efficiency.

Our mission focuses on providing quality, consultative support and fostering long-term partnerships, while their vision is to be a trusted inventory partner for India's industrial sector. We serve diverse industries, including automotive, electrical, chemical, FMCG, textiles, construction, agriculture, and logistics.

## Stockist & Importer

Acrylic | Polycarbonate | Nyloncast / PA6 / Polyamide  
Polypropylene | HDPE | UHMW-PE | PVC

Delrin / POM / Polyacetal | Syndanio | Polyurethane | FRP & Epoxy  
Bakelite | PTFE | PEEK | Silicone Rubber | PVDF | ABS | Mica
